

Requirements

1. Chrome/Safari
2. Postman app or on web
3. npm and node locally installed
4. Any IDE installed

Links to sites

1. Repository: <https://github.com/Srush-Ray/ticked-off>
2. Firebase Console: <https://console.firebase.google.com/u/0/>
3. Firebase Studio: <https://studio.firebase.google.com/>
4. Postman
Collection: <https://checked-dev-team.postman.co/workspace/My-Workspace~bd8a2c0d-06a3-4883-8492-f7605e5b1f11/collection/29138500-8aeebde1-22d6-4e37-a80b-a76e3dd03f88?action=share&creator=29138500>

Commands

1. git clone <https://github.com/Srush-Ray/ticked-off.git>
2. npm install
3. node index.js
4. node test-firebase.js

Firebase Studio PROMPTS

1. Create a Node.js Express set-up with a basic route.
2. Add firebase to this project. Link project with project id:<YOUR_PROJECT_ID> to this project.
3. Create a /add route in a separate routes module which will be imported in the basic index file. This route should accept {name:", genre: [""], type:""} as an input and create a firebase cloud firestore entry in collection:"mylist", where the document id is a uuid.
- 4.
